EXHIBITION REPORT 2019

The 12th International Oil and Gas Exploration, Production And Refining Exhibition

Organised by:

Co-Located with:

www.oilgasindonesia.com

4 Days Overview

OIL & GAS INDONESIA 2019

Oil & Gas Indonesia will be a comprehensive showcase for the energy industry of the country. The exhibition provides the most cost effective way to increase your business in one of South East Asia's biggest subsea market. Oil & Gas Indonesia is a highly focused one stop event.

Together with Marintec Indonesia, it will be the only integrated event in Indonesia providing the perfect opportunity to meet face to face with potential clients who are actively looking for suppliers in these industries.

MARINTEC INDONESIA 2019

Marintec Indonesia is a highly-focussed event for the commercial maritime industry, spanning shipbuilding, ship repair, and vessel operations. It is held alongside Oil & Gas Indonesia, a comprehensive exhibition for petroleum exploration, production, and refining services and products. The offshore oil and gas industry represents a major segment of the maritime market in Indonesia, and similarly the transportation of mineral resources is also a key market for Indonesia's ship operators. The co-location of these two exhibitions yields significant synergies for both exhibitors and buyers that lead to new interactions and business projects.

Exhibitor Testimonial

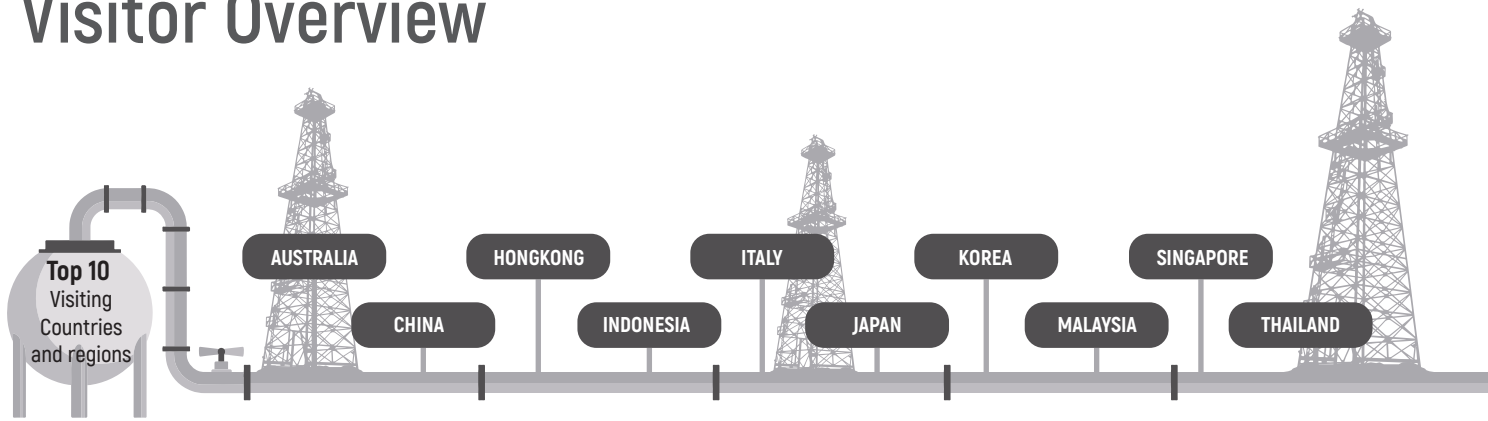

"One of our goals is to use automation to further the efficient use of energy and material resources as well as to improve product quality. Even a 1% increase in accuracy or lower use in energy and material resources can provide savings in the billions of rupiah per year. To this end we are continuously looking for new technology and partners to realize planned technology upgrades. Oil and Gas Indonesia is one of the best events to achieve just that."

Henry Chia, President Director at Endress+Hauser

"Since azaz cabotage we have seen a steady import of seafaring vessels into Indonesia, creating a trade deficit amounting to \$13.10 Billion in 2018. IPERINDO hopes that the government will take drastic action to empower the Indonesia Maritime Industry by establishing favorable tax, fiscal, and financing regulations. When the Indonesian Maritime Industry grows, it can meet the nation's demand in seafaring vessels, and in the future it might even export vessels to other countries. When that day comes we will not see a deficit in the trade balance, but we will generate a trade surplus for Indonesia. This is where Marintec Indonesia plays a pivotal role to facilitate the industry towards this journey."

Eddy Kurniawan Logam, Chairperson of IPERINDO
